

Konstantino Ambrossenkov

B.A. in Business Management from ITBA | Business Analyst focused on Commercial Transformation, Customer Experience, and Operations

I have experience in technology companies across commercial, operational, and analytical functions. I have contributed to initiatives related to customer experience, commercial support, research, process improvement, and operational organization. I am seeking to join an organization where I can bring a structured perspective on commercial growth, customer experience, and operational efficiency.

Experience

Tekne Data Labs — Marketing Ops & RevOps | Junior Sales Mar 2025 – May 2026 Buenos Aires (Hybrid) (BDR)

- Designed and operated commercial support materials and workflows, including one-pagers, scripts, playbooks, and executive documents for campaigns and conversations with potential clients.
- Conducted industry and ICP research, account mapping, and commercial prioritization for prospecting and more targeted outreach.
- Executed commercial searches and sequences with Sales Navigator and Apollo, tracking the pipeline and next steps.
- Contributed to operational alignment across Marketing, Sales, and Product through documentation, tracking criteria, and support for internal processes.
- Applied AI agents and API integrations to structure research materials and accelerate commercial tasks, with working knowledge of token-based cost structures and model selection for multi-agent workflows.

Motivia (Eira Healthcare S.A.S.) — Operations Assistant / Customer Success Buenos Aires · 3 months

- Developed and implemented SOPs and technical support workflows for onboarding, password recovery, and connection with digital health ecosystems.
- Implemented conversational automations integrating flows for diagnosis, registration, and follow-up.
- Designed databases to segment and classify users according to adoption level and activity.
- Collaborated with Product and Technology on feedback analysis, user registration activation, issue detection, and support for new features.

Projects

Mid-size Construction Company (100+ employees) — Business Diagnosis & Action Plan ITBA · 2Q 2024 · Grade: 81.97/100

- Structured business diagnosis: organizational analysis, revenue review, demand patterns, and operational gap identification.
- Developed a strategic action plan with focus on structural planning, digital presence, and cost optimization, validated through financial projections.

UNTZ — Event Analysis and Operational Support

- Conducted comparative tracking of events, linking social media actions with ticket sales pace to support commercial, operational, and promotional decisions.

Casalupi (Convenience Store and Lottery) — Operational-Commercial Analysis

- Collaborated in the analysis of the point of sale: cash flow, product turnover, and demand patterns to support operational and commercial decisions.

Personal Project

Personal Web Platform — konstantino-ambrossenkov.vercel.app Mar 2026 – Present

- Self-managed prototyping space to explore emerging digital tools and trends, develop criterion on which tool to use at each stage of the process —sketching, user flow, build— and implement data analysis in self-controlled environments.
- Applied AI-assisted development workflows including API cost management and token distribution considerations for multi-model environments.
